### TECHNOLOGY PAST THE POINT OF NUTRITION™

Active AgriScience Inc. supports the farming community by providing innovative, effective, and economical products that increase yields. A leader in plant nutrient and bioactive compound research and technology, Active AgriScience uses rigorous scientific methods to develop and enhance products to improve farm production and profits.

## INTRODUCTION

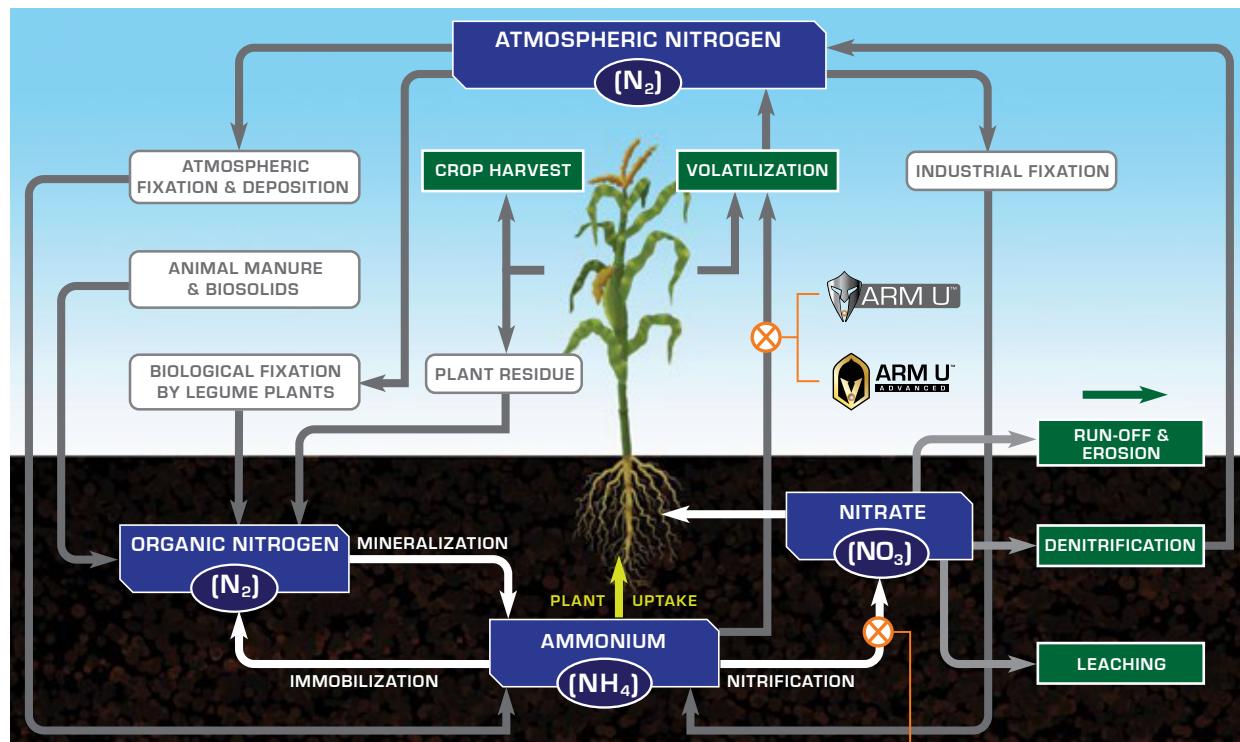

Nitrogen is essential for plant life and growth and is therefore a component of many fertilizers. Nitrogen loss is a challenge facing every grower when applying Urea or UAN in the spring or fall, regardless of the application method.

The risk of this nitrogen loss varies with:

- the type of Nitrogen
- soil type
- temperature
- management practices

**Without any protective coating up to 50% of soil-applied Nitrogen is unavailable to the plant.** It may be converted quickly to ammonia gas and then released into the atmosphere or lost in the soil due to nitrification; the process of converted ammonium ions to less stable nitrate ions. Both of these processes contribute significantly to the loss of valuable nitrogen.

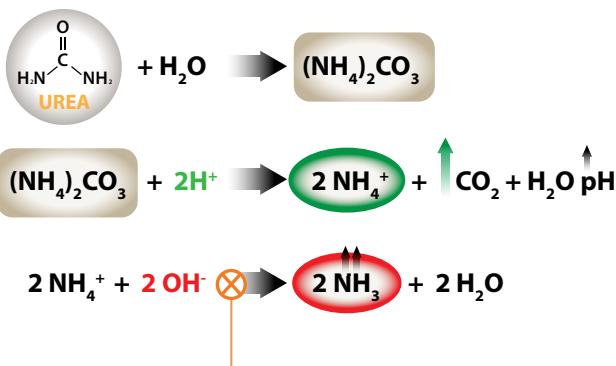

Understanding the Nitrogen cycle and the factors that can result in nitrogen loss is crucial to finding the right solution to this problem.

Volatilization and nitrification are two processes that are responsible for Nitrogen loss.

### VOLATILIZATION

Ammonia volatilization occurs during the hydrolysis of urea and is governed by the urease enzyme.

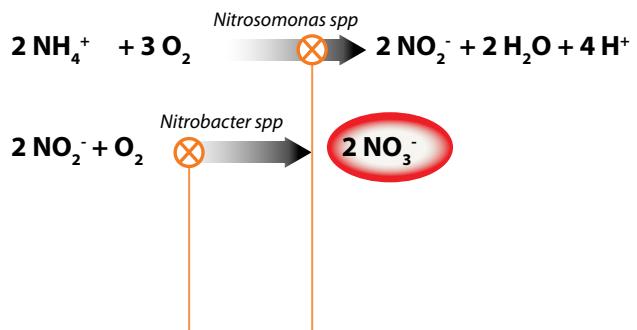

Coating urea with  
**ARM U™**  
or  
**ARM U™ ADVANCED**  
reduces ammonia volatilization  
by 95%  
by inhibiting urease  
enzyme activity.

### NITRIFICATION

Nitrate is formed by the oxidation of ammonium in the presence of *Nitrosomonas* & *Nitrobacter* bacteria.

Coating urea with  
**ARM U™ ADVANCED**  
inhibits nitrification  
by inhibiting  
*Nitrosomonas* and  
*Nitrobacter* bacterial  
activity.

## BENEFITS of ARM U™

The patented ARM U™ formula makes our products one of the most advanced Nitrogen management technologies on the market.

- Increased NBPT efficacy and efficiency  
(stabilized & buffering capacity)
- Thorough coverage and coating agent  
(spreader molecules)
- Minimal smell  
(unlike other products in the market)
- Acts as a dust control agent
- Stays in liquid form up to -15°C,  
making it easy to handle and store in cooler conditions
- Formulated and manufactured for  
North American conditions

**Patent numbers:** USA: 9422203 B2; Canada: 2889430

**Active ingredient:** 18% N-[n-butyl] thiophosphoric triamide [NBPT], CAS No. 94317-64-3.

**Total inactive ingredients:** 82 % (preservative, colorant, spreading agents, surfactant).

The patent pending ARM U™ ADVANCED formula makes our products one of the most advanced Nitrogen management technologies on the market.

- Dual Nitrogen saving technology  
(inhibits both ammonia volatilization and nitrification)
- Liquid formulation to control ammonia volatilization & nitrification  
(easy to use)
- Correct ratio of urease to Nitrification inhibitor  
(4:1 ratio)
- Increased NBPT efficacy and efficiency  
(stabilized & buffering capacity)
- Thorough coverage and coating agent  
(spreader molecules)
- Minimal smell  
(unlike other products in the market)
- Acts as a dust control agent
- Stays in liquid form up to -15°C,  
making it easy to handle and store in cooler conditions
- Formulated and manufactured for North American conditions

**ARM U™ Advanced consists of two parts:** 1) Part A 2) Part B

**PART A - Active ingredients:** 30% NBPT (N-[n-butyl] thiophosphoric triamide), CAS No. 94317-64-3

**Total inactive Ingredients:** (70%) NMP (N-methyl-2-pyrrolidone), CAS No. 872-50-4, propylene glycol CAS No. 57-55-6, ethylene glycol CAS No. 107-21-1, emulsifier, preservative, dye.

**PART B - Active Ingredients:** 15% DMPP (3, 4-dimethylpyrazole phosphate), CAS No. 202842-98-6

**Total inactive ingredients:** (85%) NMP (N-methyl-2-pyrrolidone), CAS No. 872-50-4, propylene glycol CAS No. 57-55-6, emulsifier, preservative, dye.

## • COMPARISON with COMPETITORS

<b>ARM U™</b>	<b>Competitor</b>
Patented technology	Off patent
pH balanced [6.3-6.8]-stable NBPT	High pH (>8)-unstable NBPT
No ammonia odor	Odor of ammonia
Better flowability and mixability	Caking urea
Better low temperature standability	—
Dust control ability	—

<b>ARM U™ ADVANCED</b>	<b>Competitor</b>
Patent pending	—
Liquid formulation	Powdered formulation
pH balanced [6.3-6.8]	High pH (>8)
No ammonia odor	Odor of ammonia
Better flowability and mixability	—
Better low temperature standability	—
Built in dust control ability	—
Lower application rates -1.5qt/mt	Higher application rate -15lbs/mt
Equally works on dry urea & urea solutions (UAN)	Only recommended for urea solutions

## ARM U™ BLENDING INSTRUCTIONS:

**Blending into UREA-AMMONIUM NITRATE (UAN) SOLUTIONS:** Use 1.2 L ARM U™/1000 kg UAN solution [1.5 qt ARM U™/250 gal UAN solution]. Fill spray tank with half the desired amount of UAN. Measure the recommended quantity of Arm U™ and add to the tank. Mix well. Add other products at this stage, if needed. Add the second half of the UAN solution. Continue mixing until well blended.

**Blending into UREA:** Use 2 L ARM U™/1000 kg Urea [2 qt ARM U™/2000 lbs Urea]. For uniform blending, use a blender with impregnation equipment. Weigh the urea and transfer to blender. Add the required amount of ARM U™ to the urea in the blender. Blend until the ARM U™ is uniformly mixed into the urea. Do not add any other fertilizer materials until ARM U™ is thoroughly distributed. If mixture appears wet or sticky, a drying agent may be added at this time.

## ARM U™ ADVANCED BLENDING INSTRUCTIONS:

**Preparation Instructions:** Use Part A & Part B in a 1: 0.5 ratio by volume. Premixing - Pour Part B into Part A. Mixing is not required; however, if mixing equipment is available, agitate mixture for 1-2 minutes. Use prepared mixture immediately – do not store. Treating System - Direct Part A and Part B toward the fertilizer in a 1: 0.5 ratio.

**Blending into UREA-AMMONIUM NITRATE (UAN) SOLUTIONS:** Use 1.1 L ARM U™ ADVANCED / 1000 kg UAN solution [1.4 qt ARM U™ ADVANCED / 250 gal UAN solution]. Fill spray tank with half the desired amount of UAN. Measure the recommended quantity of Arm U™ ADVANCED and add to the tank. Mix well. Add other products at this stage, if needed. Add the second half of the UAN solution. Continue mixing until well blended.

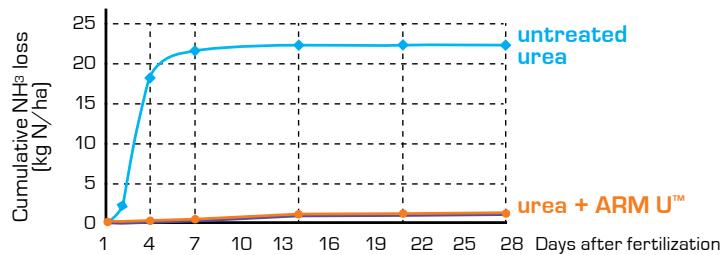

**Blending into UREA:** Use 1.8 L ARM U™ ADVANCED / 1000 kg Urea [1.8 qt ARM U™ ADVANCED / 2000 lbs Urea]. For uniform blending, use a blender with impregnation equipment. Weigh the urea and transfer to blender. Add the required amount of ARM U™ ADVANCED to the urea in the blender. Blend until the ARM U™ ADVANCED is uniformly mixed into the urea. Do not add any other fertilizer materials until ARM U™ ADVANCED is thoroughly distributed. If mixture appears wet or sticky, a drying agent may be added at this time.
