TECHNOLOGY
BEYOND
the POINT
of NUTRITION[™]

Active AgriScience Inc. supports the farming community by providing innovative, effective and economical products that increase yields. A leader in plant nutrient and bioactive compound research and technology, Active AgriScience uses rigorous scientific methods to develop and enhance products to improve farm production and profits.

**CORRECTS
ZINC
DEFICIENCY**

Active ZINC[™] 9.8% Zn is a foliar-applied zinc fertilizer solution that prevents or corrects zinc deficiency that can reduce crop yields. Zinc is essential for plant enzymatic processes, including photosynthesis and the production of indoleacetic acid, that affect stem length, leaf size, and overall yield. If soil temperatures remain cool during spring planting and early growth, zinc supplementation may be particularly beneficial. Some crops however, may not require additional zinc, and caution is needed to avoid zinc toxicity.

ACTIVE ZINC[™] SUPPORTS

ENZYMATIC PROCESSES

STEM LENGTH, LEAF SIZE AND OVERALL YIELD

PHOTOSYNTHESIS

PRODUCTION OF INDOLEACETIC ACID

DIRECTIONS

Apply as a foliar treatment in a regular spray program or as a corrective spray to alleviate nutritional deficiencies. Also for use in blended fertilizers. Suitable for ground or aerial spraying.

Wheat, canola, soybean, corn, potatoes, peas, lentils and other pulse crops: apply at the rate of 0.5 L – 1 L / acre (1.25 L - 2.5 L / ha) with a minimum of 40 L of water. Ensure sufficient water for thorough coverage.

Use this product on the basis of soil and tissue analysis in accordance with recommendations of a qualified person or institution or apply according to recommendations in your approved nutrient program.

GUARANTEED MINIMUM ANALYSIS:

Zinc (Zn)(actual)	9.8%
Sulfur (S)	4.8%
